Projects

Change | Project Owner & Software Engineer | <http://www.changeis.life/practice.html>

Platform for donors to make digital payments to those in need

- Engineered front-end architecture to communicate new financial transactions with Stripe API
- Streamlined user engagement by designing a clean and intuitive frontend using React and Bootstrap
- Built PostgreSQL database schema and used Sequelize ORM to create, retrieve, update and delete data
- Increased team productivity by automating tasks such as Gulp

BarCrawler | Software Engineer | <https://mks-barcrawler.herokuapp.com/#/landing>

Pub crawl app that shows images from the top bars along user route

- Lead design for Node + Express server with REST API endpoints to front-end UX
- Served suggested bars, images & directions by using Foursquare, Instagram and Google Maps API
- Integrated auto-complete feature in address search bar

Duel | Software Engineer | <https://github.com/OrbitingKittens/challenge>

Social web application that allows users to create and share challenges with their friends and family

- Implemented user authorization using Facebook Login
- Developed algorithm to efficiently search for users and challenges in our database
- Created a clean user-interface by using Angular, Bootstrap, CSS3 and HTML5

Professional Experience

Electronic Arts | Global Engagement Marketing Campaign Manager Feb 2014 – Mar 2015

- Designed responsive HTML files to be featured in email marketing content
